

VERONICA ANDERSEN

Frontend Developer / System Developer / Full-Stack Web Engineer

+46700291385 | veronica.e.andersen@gmail.com | Alingsås, Sweden | www.linkedin.com/in/andersenveronica | <https://veronicaandersen.github.io>

PERSONAL STATEMENT

Creative and results-driven developer with 3 years of experience crafting responsive, accessible, and visually engaging user interfaces. Skilled in modern JavaScript frameworks like **React** and **Next.js**, and passionate about turning design concepts into seamless digital experiences. Strong eye for detail, **UX** principles, and performance optimization. Thrives in collaborative environments, working closely with designers and stakeholders to bring ideas to life with clean, maintainable code.

SKILLS

.NET, C#, JavaScript, TypeScript, React, Blazor, Kendo UI, HTML/CSS, MSSQL, NextJS, Python, A/B testing, frontend, backend, API, Azure DevOps, Google cloud, Git, Agile (Scrum, Kanban), GraphQL, Tailwind, Radix UI, User experience, Test Driven Development (TDD), Figma, Adobe Illustrator, Photoshop, InDesign, XD, Troubleshooting, CI/CD, Unit Testing (JUnit), web design, sass/less, SCSS, web applications

CAREER EXPERIENCE

Full-Stack Web Engineer – Sleep Cycle AB Göteborg Apr 2025 – Jul 2025

- ▶ Engineered high-performance, responsive web pages for advertising and affiliate campaigns, increasing user engagement and load speed by 40%.
- ▶ Integrated backend features for pricing models, packaging logic, and affiliate management using **Next.js**, **Python**, and **PHP**.
- ▶ Implemented tracking integrations with Google Analytics, enabling precise campaign performance analysis.
- ▶ Collaborated cross-functionally with designers using Figma, marketing, and engineers to deliver seamless digital experiences under tight deadlines.
- ▶ *Tech stack:* Headless **WordPress**, Next.js, **TypeScript**, **Tailwind** CSS, Radix UI, **GraphQL**, **Google Cloud**, SCSS, **API** development and **Git**.

Consultant Developer – Experis Academy / Experis AB Sep 2022 – Mar 2025

Software Engineer Consultant – Volvo Digital & IT AB Skövde Aug 2023 – Jan 2025

- ▶ Modernized legacy applications by transitioning front-end stacks to **React** and **Blazor**, improving **UI** performance and maintainability.
- ▶ Built and maintained web solutions using **C#**, HTML, and **MS SQL**, supporting operations across business units.
- ▶ Utilized **Azure DevOps**, Git, and TFVC for version control, **CI/CD**, and team collaboration.
- ▶ Practiced Agile (Scrum & Kanban) and TDD, delivering features on-time with fewer post-deployment bugs.

- ▶ Actively communicated with stakeholders to ensure technical solutions aligned with business needs.

System Developer Consultant – Syncify AB Göteborg

Sep 2022 – Jun 2023

- ▶ Developed custom e-commerce features and admin dashboards using C#/.NET, JavaScript, and Kendo UI.
- ▶ Led project planning, backlog grooming, and sprint retrospectives, improving delivery predictability.
- ▶ Identified and implemented performance improvements that reduced page load time by 30%.
- ▶ Diagnosed and resolved production bugs, ensuring uptime and optimal user experience.

EDUCATIONAL BACKGROUND

Experis Academy – Göteborg

Jul 2022 – Sep 2022

Completed a 12-week intensive Java development program in collaboration with leading Swedish companies. The course combined theoretical knowledge and practical skills to prepare participants for roles such as Java developer and application developer. Key areas of learning included core Java principles, Object-Oriented Programming (OOP), unit testing with JUnit, software architecture, and frontend development with JavaScript, HTML, CSS, and frameworks like React and Angular.

University of Skövde – Skövde

Aug 2018 – Jun 2021

Earned a Bachelor's degree in Web Development, focusing on web design and programming. The curriculum covered HTML, XML, CSS, JavaScript, PHP, and Ajax, UX, emphasizing on database integration, web security, and mobile application development.

Alströmer High school – Alingsås

Aug 2014 – Jun 2017

Studied Technology with design & product development. The curriculum covered a lot of design with different point of views. Working with Figma, Adobe Illustrator, Photoshop, InDesign, XD, CAD, paper, clay and steel.

CERTIFICATION

Introduction to Python – Meta (Coursera)

Mar 2025

Introductory course covering foundational Python programming skills.

- ▶ Learned core concepts such as variables, user input, decisions, and loops
- ▶ Applied computational thinking and scripting techniques to solve problems
- ▶ Gained practical experience in programming principles for web and application development using Python

[View certificate](#)

Meta Front-End Developer – Meta (Coursera)

Mar 2025

A comprehensive 9-course program preparing for an entry-level career in front-end development.

- ▶ Built responsive websites using HTML, CSS, JavaScript, and React
- ▶ Applied UI/UX principles through usability testing, user research, and accessibility
- ▶ Gained hands-on experience with Git, GitHub, and version control
- ▶ Learned Bootstrap framework and developed portfolio-ready projects
- ▶ Practiced interview preparation, pseudocode, and JavaScript testing with Jest
